ABOUT US

At Henshaw we strive to give you a seamless service. We provide repairs, fittings, brand new and bespoke products to meet all your needs. We build and manufacture to your detailed specification, and work closely with you to ensure we deliver the highest quality work. All our work is carried out at our Wincanton factory. The Sales, design and production team are all situated together meaning you're always guaranteed to get the very best customer service.

Our history

Henshaw's humble beginnings started in 1974, founded in the heart of Somerset in the UK. Henshaw has a history of building the world's highest quality inflatables. With 50 years in the business, you could say we know a thing or two. We have worked on bespoke projects for movies and TV, provided projects to governments and defence agencies globally, and will offer custom and bespoke solutions to both the leisure and commercial markets. Our team continues to grow and as we look forward to many more years to come.

The future looks bright as we head into our 50th year in 2024! The team continues to expand, and the success of our brand and our products continue to thrive worldwide. Diversification continues as we branch out from our core products of inflatables and offer a wider range of products from foam construct stern fenders and collars, to hybrid builds, PU sprayed products, and a vast array of drop stitch options. New technologies, such as 3d scanning allows us to capture more integral information in the field and back at HQ, while customer service, quality, and excellence remain at the forefront of what we deliver.

NEW IN

SHAW 400

September 2023 saw the release of a brand-new product, designed and built in house, Shaw400.

This fully inflatable 4m tender is built to be lightweight, streamlined, balanced, quick, aesthetically beautiful, and fully stowable. The Shaw400 was a Henshaw team creation, which started with the idea of being able to provide a tender which was both functional, exhilarating, able to be pushed to its limits, while remaining lightweight and compact.

The Shaw 400 is capable of being housed in superyacht garages, the back of yacht decks, at home, transported in vehicles without the need for a trailer, and can be boxed and shipped worldwide with ease.

The collar is constructed of Orca 866 Hypalon, and the colour choices can be customised to a customer's request. The drop stitch deck is also supplied by Orca, the highest quality drop stitch. This gives the Shaw 400, stability while allowing flexibility, and comfort during your ride. The Shaw400 made its debut at the Southampton International Boat Show and will be available for retail sale from January 2024. Pre orders are currently being taken. For more information reach out to the Henshaw Sales team

INFLATABLE COLLARS

Our inflatable collars are hand made in the UK and designed with care. A retube will give your boat a fresh new look, making your boat look and feel brand new.

INFLATABLE COLLARS

We provide a 6-8-week lead time on our inflatable collars, this allows you to be out on the water for as long as possible.

INFLATABLE COLLARS

Each collar is made to order, tailored to your specific requirements. Whether you need a specific colour, size, or additional features, our team will work closely with you to create a personalized solution that perfectly suits your vessel.

We offer every customer a 1-year build warranty and a 5-year fabric warranty.

INFLATABLE COLLARS

Complex tubes are welcome at Henshaw. After 50 years of service in the marine industry, we not only have a large database of builds, but we now use 3d scanning to model tube against that hull not just the boat

NEW TECHNOLOGY

The incorporation of contemporary 3D technology has proven advantageous for the marine industry. Beyond facilitating precision and accuracy for any hull, it empowers us to customise templates and models to precisely match your boat.

Our commitment to delivering a top-tier service To each customer, motivates us to treat each received boat as a unique construction, ensuring that it undergoes thorough scanning and treatment alike a new build.

SOLID FOAM COLLARS

Marine-grade foam tubes, once a staple of commercial and military vessels, are now emerging as the go-to choice across a broad spectrum of marine industries. Renowned for their exceptional resilience in unforgiving environments, these foam tubes are revolutionizing the way boats and watercraft perform.

SOLID FOAM COLLARS

Foam tubes have earned their reputation for longevity and unmatched durability. They are built to withstand years of rigorous use without compromising on performance. Their buoyancy and shock-absorbing properties significantly improve the safety of any watercraft.

HYBRID COLLARS

Our Hybrid Foam Collar combines the best of both worlds by fusing the buoyancy and impact-resistance of foam with the robustness of high-quality materials. This unique combination sets a new standard for marine safety.

Beyond its primary use in commercial and military vessels, the Hybrid Foam Collar is gaining popularity in recreational boating, watersports and offshore exploration. Made in-house these foam tubes can be manufactured to your specification and provide the protection and durability you would like.

FOAM SPRAYED PRODUCTS

All PU spraying is done on site by our fantastic team and we're exceptionally lucky to have state of the art spraying facilities.

PU spraying is a great option that we're able to offer our customers looking at wanting to add extra protection to their foam product with a polyurea spray.

Textured finish

Smooth finish

FOAM SPRAYED PRODUCTS

Polyurea spray will make the product extremely hard wearing and provides amazing longevity. We can manage the finish and the thickness of the spray to meet your products' needs. It is most commonly finished in black, but PU paint is now also available at Henshaw's for customers with a specific design in mind. PU paint is available in a variety of colours and finishes.

FOAM SPRAYED PRODUCTS

This particular model was sprayed with a textured spray finish giving it an industrial and robust style.

INFLATABLE FENDERS

Now with a new range of fully customisable fenders! Made of the highest quality Orca Hypalon, available in a range of exciting colours. Our designers can incorporate your logos, boat name and unique patterns into your fender design to make you stand out in the harbour.

INFLATABLE FENDERS

Available in many shapes and sizes, Hypalon fenders are good quality that will last.

Inflatable fenders are a perfect solution for any yacht that is compromised on space, as they can be flat packed and stored in any locker box.

Beyond its functional excellence, foam fenders have been market leaders in yacht protection for years. A sleek yet simple way of encasing your stern in a durable defensive barrier against neighbouring vessels. Everything from the foam milling, shaping, sanding, spraying is all done in house. We also have the ability to manufacture the composite plates required, so it really is a one stop shop for all things fender related.

FOAM FENDERS

SELF-RIGHTING BAGS

Constructed from Hypalon fabric, self-righting bags are engineered to withstand various harsh conditions. This includes resistance to ultraviolet rays, saltwater, exposure to engine oil, and extreme temperature fluctuations. The use of high-quality materials is paramount to ensuring safety in situations where lives may be at risk.

Self-righting bags are used by many safety and rescue boats across the world but can be a great addition to any work or commercially used boats to provide an extra level of safety upon your craft.

BESPOKE PROJECTS

Custom inflatable toy products
Henshaw Inflatables have a team of amazing design
engineers and boat builders always eager and ready to
explore new ideas.

Sea pools and jet ski drop stich
platforms available to fit all needs
and wants.

SEA POOLS

To accommodate a great experience for you, our design team can make you a bespoke platform to fit all your requirements with a high degree of accuracy and precision.

Available as modular or singular attachments.

Immerse yourself in aquatic luxury with our Sea Pools. Imagine having your own private oasis, a tranquil sanctuary nestled on the waters edge, where the boundaries between land and sea blur, and relaxation reaches new depths. Discover the perfect blend of nature, design, and serenity with Sea Pools.

JET-SKI PLATFORMS

Our Jet ski platforms provide safe and secure storage. They can be deflated to fit within the smallest of lockers. These platforms can be designed in a variety of different ways to suit the needs of you and your yacht.

INFLATABLE SLIDES

The most exceptional method to create a memorable impact, a towering slide has evolved into the epitome of high-end superyacht entertainment. As providers of top-tier yacht slides, we specialize in crafting and producing inventive solutions that seamlessly combine the thrill of use with effortless deployment.

RE-TUBE WORK

Witness the transformation as we revive old tubes and bring them back to their former glory.

RE-TUBE WORK

RE-TUBE WORK

RE-TUBING PROCESS

We pride ourselves in the fact that we care about are craftsmanship and quality of our design and build. Here is an insight into how things are made at Henshaw.

FOAM FENDER BUILD

We think it is important that you, the customer, are kept up to date with your projects, so therefore we wanted to show you the behind the scenes of the process of manufacturing a foam fender.

PART SUPPLIERS

Here at Henshaw, we have an entire stores department dedicated to stocking a variety of different parts and accessories ready for immediate dispatch. We work with trusted partners to offer our customers the very best products on the market. As specialists in marine products and technology, we pride ourselves in only using the very best that the sector has to offer. We can take orders in person, over the phone or via our website. We can ship globally and always have experts on hand to be able to offer a seamless service every time.

Thank you,

Henshaw

RUBSTRAKE PROFILES

Raised Profile - Light grey

H9040025

Low profile rubbing strake, with a slightly curved surface to give added protection to tubes to reduce damage and impact.

Raised profile - Black

H9040037

Low profile rubbing strake, with a slightly curved surface to give added protection to tubes to reduce damage and impact.

Big 'D' Profile - Light grey

H9040027

Heavy duty rubbing strake use to protect tubes from damage and impact. Offers maximum protection to any craft.

Big 'D' profile - Black

H9040004

Heavy duty rubbing strake used to protect tubes from damage and impact. Offers maximum protect to any craft.

RUBSTRAKE PROFILES

Teardrop profile - Light grey
H9040001

Commonly referred to as a shark fin shape, this rub strake provides good protection and maintains a sleek appearance.

Teardrop profile - Black
H9040002

Commonly referred to as a shark fin shape, this rub strake provides good protection and maintains a sleek appearance.

Small 'D' profile - Black
H9040029

Low profile rubbing strake, with a slightly curved surface to give added protection to tubes to reduce damage and impact.

Small double 'D' profile - Black
H9040031

Low profile rubbing strake, with a slightly curved surface to give added protection to tubes to reduce damage and impact.

Flat Profile - Light grey
H9040033

A low profile rub strake with five shallow ridges used to protect tubes from damage, impact and abrasion.

Flat profile - Black
H9040035

A low profile rub strake with five shallow ridges used to protect tubes from damage, impact and abrasion.

RUBBER MOULDINGS

Millennium cleat handle - Light grey

H9040044

A millennium cleat handle is a stylish, modern and functional handle, which can be attached to tubes to provide a good hand hold as well as a point to secure rope.

Millennium cleat handle - Dark Grey

H9060003

A millennium cleat handle is a stylish, modern and functional handle, which can be attached to tubes to provide a good hand hold as well as a point to secure rope.

Oval handle - Dark grey

H9040047

Small rubber handle, neatly designed for a subtle finish. Most commonly seen on leisure boats.

Oval handle - Black

H9040043

Small rubber handle, neatly designed for a subtle finish. Most commonly seen on leisure boats.

Millennium cleat handle- Black

H9040042

A millennium cleat handle is a stylish, modern and functional handle, which can be attached to tubes to provide a good hand hold as well as a point to secure rope.

Oval Handle - Light grey

H9040048

Small rubber handle, neatly designed for a subtle finish. Most commonly seen on leisure boats.

MOD Strap handle

H802000(X)

Small rubber handle, neatly designed for a subtle finish. Most commonly seen on leisure boats. Hand made in any colour of your choosing.

VALVES

D7 Inflation/Deflation Valve - Black
H9010049

The D7 Valve has improved inflation/deflation speed compared to the C7. It has an improved clamping method, with an 'O' ring seal added.

D7 Inflation/Deflation Valve - Grey
H9010045

The D7 Valve has improved inflation/deflation speed compared to the C7. It has an improved clamping method, with an 'O' ring seal added.

A6 PRV - Black
Available in multiple PSI

The A6 Pressure Relief Valve has become a firm favourite with many manufacturers of leisure liferafts, RIBs and river rafts around the world.

A6 PRV - Grey
Available in multiple PSI

PRV valves are ideal for any use where compact and reliable valves are critical, for example, on commercial & military inflatable boats.

C7 Inflation/Deflation Valve - Black
H9010056

The C7 valve has become the favourite inflatable boat valve for use in demanding applications such as Military and Commercial RIBs.

C7 Inflation/Deflation Valve - Grey
H9010055

The C7 valve has become the favourite inflatable boat valve for use in demanding applications such as Military and Commercial RIBs.

A9 PRV
Available in 10 15 20 PSI

The A9 is a compact and robust Pressure Relief Valve perfect for uses where reliability and smaller size are critical.

ACCESSORIES

D-ring fabric patch

Customisable to colour and size

Made to any size and colour a d ring patch can be a stylish addition to your product.

Webbing loop patch

Customisable to colour and size

Made to any size and colour a webbing loop patch can be a stylish addition to your product.

white

H9050008

A classic 3-Strand construction rope, which is easy to splice. Is often a popular mooring rope option, with its classic look and exceptional performance.

12mm 3 strand polyester rope-
black

H9050010

A classic 3-Strand construction rope, which is easy to splice. Is often a popular mooring rope option, with its classic look and exceptional performance.

Rope-go - Black

H9040019

A stylish way of adding rope into your tube design.

Rope-go - Grey

H9040057

A stylish way of adding rope into your tube design.

Jamming bow cleat roller

H9040049

Easy to install and convenient to use. Made from a strong and durable material for longevity.

OUR FABRIC RANGE

Henshaw Inflatables collaborates with esteemed global partners, ensuring access to premium materials and components for our products. Among our valued fabric suppliers, Orca Pennel & Flipo stands out, contributing top-tier Hypalon that graces all our products. The Hypalon comes in an extensive array of colours, allowing you to tailor your selection to meet specific requirements. Our Hypalon is predominantly available in 866 (1500gsm) or 828 (1300gsm), and custom thicknesses can be accommodated upon request.

Additionally, we present a diverse selection of non-slip fabrics designed for leisure, commercial, and military vessels, offering enhanced traction where needed. These non-slip options prove instrumental in extending the longevity of your products, particularly in scenarios of intensive use.

Thank you,

Henshaw

HEAVY DUTY WEAR
PATCHES

Coruba diamond

Coruba is a high quality, virtually non-slip rubber matting, which is available in multiple colours. It has a unique and attractive ‘Rhombus’ (diamond pattern), each diamond having a slip resistant embossed pattern on the surface.
