

Step 1:
Remove base plate from its bag

Step 2:
Remove the aluminum extrusions from their bag

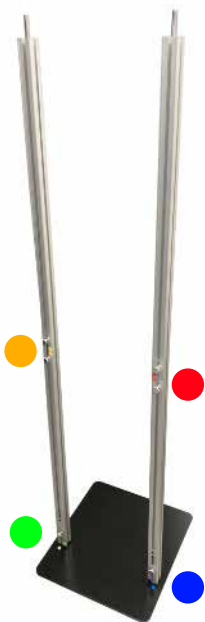

Step 3:
Place the the extrusions with blue and green stickers on the corresponding pegs on the base plate

Step 4:
Tighten the thumbscrews

Step 5:
Place the upper extrusions, matching the colors. Slide the inserts to cover the seam. Tighten the thumbscrews.

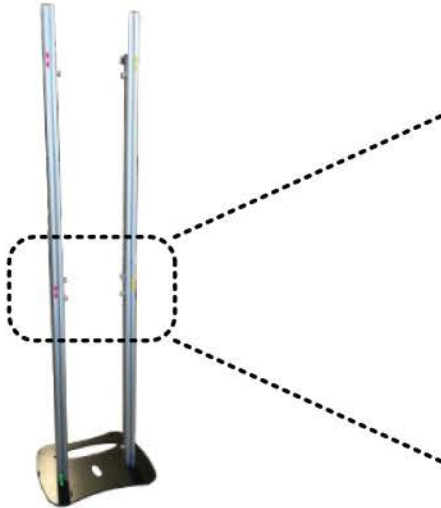

Rear View

Once your portable monitor stand has been installed, do not add the top plate just yet.

Portable Monitor Stand Graphic Wrap

Begin with "Portable Monitor Stand" Instructions

DO NOT INSTALL TOP PLATE

Point screws towards each other on the inside of the frame.

Fully Constructed Portable Monitor Stand

Slide fabric graphic down over extrusion posts. Slide slowly to protect the fabric from catching and causing damaged.

Install top plate by placing two screws opposite top and bottom

Place the remaining two screws to fully connect the top plate to the stand

Once plate is installed, you can adjust the fabric wrap for a smooth finish.

Portable Monitor Stand Graphic Wrap

SLIT in fabric graphic representing shelf location

Bracket Plate screwed through slit in graphic to the post extrusion. Repeat for each shelf location

Bracket connecting to plate. Repeat for each shelf location

TV VESA Plate Size may vary

Two shelf brackets shown installed

Once brackets are installed, you can begin to place your shelves on brackets. Please note, shelves are not secured to brackets and can shift.

You can now install your TV, by sliding the TV onto the bracket of your stand.
