The 2017 National Radio and Television Technical Expert Competition was held in Beijing from November 20 to 23, 2017. The competition featured two categories—monitoring systems and cable television network systems—and was organized by the Science and Technology Department of the State Administration of Press, Publication, Radio, Film and Television (SAPPRFT), which was responsible for setting the examination questions. The SAPPRFT Science and Technology Committee served as the primary implementer, with the SAPPRFT Academy of Broadcasting Science and the Radio and Television Planning Institute acting as co-organizers.

A total of 96 contestants participated in the competition, representing press, publication, radio, film and television bureaus from provinces, autonomous regions, and municipalities nationwide, as well as the SAPPRFT Regulatory Center and China Cable. Following rigorous theoretical and practical skill assessments, 90 contestants received awards, including nine first-prize winners such as Huang Jilin and He Jinshi, 31 second-prize winners, and 50 third-prize winners. SAPPRFT decided to confer the title of “2017 National Radio and Television Technical Expert” upon all 90 awardees and issue them national technical expert certificates.

The competition’s closing ceremony took place on the afternoon of November 23 in the SAPPRFT conference room. Attending leaders included Tian Jin (SAPPRFT Party Group Member and Deputy Director), Wang Xiaojie (SAPPRFT Chief Engineer and Executive Deputy Director of the Science and Technology Committee), Xu Jiaqi (Director of the Science and Technology Department), Zou Feng (President of the Academy of Broadcasting Science), Fang Hua (Deputy Director of the Personnel Department), Yang Xiaodong (Deputy Inspector of the Science and Technology Department), Du Xiaowen (Vice Chair of the SAPPRFT Labor Union), Xie Jinhui (Vice President of the Radio and Television Planning Institute), and Du Wenfu (Director of the Technical Collaboration and Innovation Division of the All-China Federation of Trade Unions). The leaders also joined all contestants for a group photograph.

The ceremony was presided over by Comrade Xu Jiaqi. Comrade Fang Hua read the commendation announcement, and leaders seated on the podium presented certificates to the nine first-prize winners from both professional categories. Comrade Tian Jin then delivered a speech, expressing four hopes for the system’s scientific and technical workers, particularly young frontline technicians: first, strengthen political awareness by connecting with the “antenna”; second, refine professional expertise to solidify the “foundation”; third, correct work style to serve as an “exciter”; and fourth, enforce strict discipline to build a “firewall.”

Tian Jin further expressed that SAPPRFT hopes all award recipients will thoroughly study and implement the spirit of the 19th Party Congress, firmly establish the Four Consciousnesses, promote the spirit of craftsmanship, keep pace with radio and television technology development, continue diligent study and practice, continuously improve their political and professional competence, and contribute to safe radio and television broadcasting. He also expressed hope that press, publication, radio, film and television departments at all levels will attach great importance to technical talent training and reserves, conscientiously organize provincial-level technical training, encourage technical personnel to become technical pacesetters and professional leaders, and make greater contributions to the development of radio and television.
