## Abstract

## Full Text

M. A. Ilyinskaya-Tsentilovich and B. P. Guryev. Peculiar features of the stem formation process in winter wheat varieties with regard to "lodging" . . . 217

## PHYSIOLOGY

A. N. Aliev. The modes of development of intoxication in the case of administration to animals of subthreshold doses of *Vibrio septic* toxin . . . 220

E. M. Plisetskaya. Intestine and bladder musculature of a frog in the ontogenesis, as acted upon by acetylcholine and adrenalin . . . 223

N. P. Samoshkin. On the changes occurring in the basal metabolism of rabbits in the course of development of experimental atherosclerosis . . . 227

A. M. Ugolev. Adaptive properties of gastric juice . . . 230

## EMBRYOLOGY

V. I. Kanterova. The structure of intercotyledonal chorion in *Bos taurus* . . . 233

N. N. Rott. On certain regularities observed in the growth of a chick embryo at different temperatures of incubation . . . 237

## CORRECTIONS

In the article by B. B. Govorkov, V. I. Gol' danskii, O. A. Karpukhin, A. V. Kutsenko, and V. V. Pavlovskaya, "Elastic scattering of  $\gamma$ -quanta with energies up to 129 MeV by protons," published in *DAN*, vol. 111, no. 5, 1956:

Location	Printed	Should read
p. 989, line 1 from bottom	-19-	-19-
p. 990, line 1 from bottom	statistical magnetic moment	static magnetic moment
p. 991	Received 14 VI 1956	Received 14 VIII 1956

In the article by the same authors, "Dependence of the photoproduction cross sections of  $\pi^0$  mesons on the mass numbers of nuclei," published in *DAN*, vol. 112, no. 1, 1957:

Location	Printed	Should read
p. 40, line 23	The yield of photoproduction of $\pi^0$ mesons ...exceeds the yield for $\pi^0$ mesons	The yield of photoproduction of $\pi^\pm$ mesons ...exceeds the yield for $\pi^0$ mesons
Caption to Fig. 4	$1-\sigma_{\pi^+n}/\sigma_{\pi^+p}; 2-\sigma_{\pi^-p}/\sigma_{\pi^+p}$	$I-\sigma_{\pi^0p}/\sigma_{\pi^+n}; II-\sigma_{\pi^0n}/\sigma_{\pi^-p}$

In Table 1, in the upper line the 4th and 5th columns are combined under  $E_{\max} = 200$  MeV; it should be: 4th column  $\bar{E}_{\max} = 200$  MeV, 5th column  $\bar{E}_{\max} = 180$  MeV.

In the notation  $E_{\max}$  in the table and in the text, the averaging index has everywhere been omitted; it should be  $\bar{E}_{\max}$ .

In our article, published in *DAN*, vol. 111, no. 1, 1956 (V. S. Kirpichnikov, A. N. Svetovidov, and A. S. Troshin, "Labeling carp with radioactive isotopes of phosphorus and calcium" ), in Table 1, in our calculations for estimating the error, the figures of the last two columns should be 10 times smaller than those given in the table.

*V. Kirpichnikov, A. Troshin, A. Svetovidov*
