Abstract

Full Text

N. I. Nuzhdin, N. I. Shapiro and I. A. Nechaev. The rôle of constitutional (hereditary) peculiar traits in the radiosensitivity of animals 1126

HYDROBIOLOGY

E. F. Manuylova. On the quantitative investigation of the rôle of bacteria in the development of Cladocera under natural conditions 1129

V. M. Nadezhin. The effect of hydrological conditions upon the concentration of certain White-Sea herrings 1133

MICROBIOLOGY

N. A. Krasilnikov, A. A. Drobkov and O. G. Shirokov. The accumulation of naturally radioactive elements by soil microorganisms 1136

PLANT PHYSIOLOGY

E. G. Greenfeld. On the catalase activation in seeds treated in a centrifuge 1138

D. I. Sapozhnikov and N. V. Bazhanova. A description of the light reaction in isolated chloroplasts 1141

V. M. Torchinskaia. The effect produced by 2,4-dichlorphenoxyacetic acid upon nitrogen metabolism in lupine seedlings and withering leaves of *Nicotiana rustica* 1144

PLANT EMBRYOLOGY

A. V. Konstantinov. Apospory in the apple tree 1147

ZOOLOGY

A. S. Konstantinov. On the type of growth of Chironomidae larvae 1151

G. G. Martinson. The origin of the Baikalian fauna viewed in the light of Paleontological research 1155

I. K. Rzhepishevsky. Certain diagnostic features in naupliuses of three species of the Barents Sea *Balanus* 1159

PHYSIOLOGY

L. P. Semenova. Changes observed in the nerve-endings in the muscular tissue of rats suffering from E-avitaminosis 1162

EMBRYOLOGY

T. A. Dettlaff. The coupling of gametes in the absence of Ca ions in Acipenseridae 1165

CORRECTIONS

In my article published in *DAN*, vol. 117, no. 3, 1957 (D. E. Dolidze, “On the unsteady flow of a viscous fluid between parallel porous walls”):

Location	Printed	Should read
p. 381, line 10	$y[\Phi(0, t) + F^0(0, t)]$	$y[\Phi_y(0, t) + F_y^0(0, t)]$
p. 381, line 13	\int_0^h	$\int_{-\varepsilon}^{h+\varepsilon} (\varepsilon > 0)$
p. 383, line 13 from bottom	$p - p_0 = \frac{\rho}{2} B(t)x^2$	$p_0 - p = \frac{\rho}{2} B(t)(\lambda x^2 - 2x)$

D. E. Dolidze

In the article by V. E. Bekker, “On the influence of conditions of existence on the development of gonads and the portioned spawning in the goldfish (*Carassius carassius* (L.)),” placed in *DAN*, vol. 117, no. 5, 1957, on page 891, the phrase in lines 13-20 should read:

In the gonads of females from pond no. 1 (Fig. 2a, 1), oocytes of all phases of small and large growth are present, up to phase D_6^* . In females from pond no. 2 (Fig. 2a, 2), oocytes of all phases of small growth are also visible in the ovaries;
