Abstract

Full Text

N. I. Shapiro and N. V. Belitzina. Antibiotics as substances reducing the effect of irradiation on cells 904

BIOCHEMISTRY

G. N. Zaizeva, Li Tsiun In and A. N. Belozersky. An investigation of acid-soluble nucleotides of *Azotobacter vinelandii* with reference to the culture age and to the nitrogen component of the medium 908

D. F. Sokolov. Biochemical changes taking place in the composition of the organic matter of slash in the process of its decomposition 912

PLANT MORPHOLOGY

A. N. Sladkov. On certain fossil spores of Filicales 916

PLANT EMBRYOLOGY

S. A. Admiral' skaia. Fertilization, embryo and endosperm development in the allopolyploid form of *Mentha piperita* L. 919

PLANT PHYSIOLOGY

P. G. Kosikova. The germination of seeds of certain species of weeds and ruderal plants in the case of gibberellinic acid applied in varying concentrations . . . 922

J. A. Nesterov. The localization of alterations connected with the character of the rest period in the apple tree 925

N. S. Petinov and A. N. Pavlov. On the participation of spikelet glumes of wheat in nitrogen absorption in the case of foliar nutrition 929

V. V. Skripchinskii. Peculiarities in the development and cold resistance of certain spring wheats, as related to their photoperiodic reactions 932

EXPERIMENTAL MORPHOLOGY

A. A. Kolosova. Healing of heart wounds in birds 936

ENDOCRINOLOGY

A. A. Voitkevich, E. I. Zubkova and I. I. Grigorieva. The effect of temperature on the neurosecretion taking place in the preoptic nucleus of the frog . . . 940

PARASITOLOGY

G. A. Kotel'nikov. The development cycle of the cestode *Fimbriaria amurensis* nov. sp.—a parasite of domestic ducks 944

V. I. Petrochenko. The interpretation of the development cycle of a tapeworm of geese, *Drepanidotaenia przewalskii* Skrjabin, 1914 946

N. N. Shevchenko and G. I. Vergun. The interpretation of the development cycle of the trematode *Astiotrema monticelli* Stossich, 1904 949

CORRECTIONS

In the article by N. P. Korneichuk, “On the Approximation of Periodic Functions Satisfying a Lipschitz Condition by Bernstein-Rogozinskii Sums,” published in *DAN*, vol. 125, no. 2, 1959, formula (11) should read

$$\mathcal{E}_n(a, \beta) \leq \frac{1}{(n+1)^\alpha} \left\{ \left(\frac{\pi}{2} + \varepsilon_n \right) a + \left(\frac{1}{2} + \frac{1}{\pi} \operatorname{si} \pi \right) (1-a) \right\} + \frac{\alpha c_n}{(n+1)^{\alpha+1}}. \quad (11)$$

In my article, published in *DAN*, vol. 126, no. 3, 1959 (M. I. Kiselev, “On the Calculation of Shock Waves in Magnetohydrodynamics”), the factor $(k+1)$ was omitted before the last term of equation (6). It should read:

$$-(k+1)V_{1x}^2 h_{1y} p_1 \left(1 - \frac{u_{1x}^2}{V_{1x}^2} \right) = 0.$$

M. I. Kiselev
