Abstract

Full Text

ECOLOGY

V. M. Galushin. Indices of the predatory activity of birds of prey on the number of their victims 936

HYDROBIOLOGY

M. B. Ivanova. Respiration intensity of certain planktonic Crustacea, and their effect on the photosynthetic process in a dystrophic lake 939

I. B. Ulanovskii, N. I. Tarasov, E. P. Turpaeva, Iu. M. Korovin. Corrosion of rustless steel, under the influence of the life activity of barnacles 941

MICROBIOLOGY

L. G. Azova. Butyric acid fermentation on a synthetic medium containing pyruvic acid and glycerine 945

BIOPHYSICS

E. A. Gileva. Accumulation coefficients of seven radioisotopes by three fresh-water algae 948

BIOCHEMISTRY

G. N. Zaitseva, A. N. Belozerskii. The formation and assimilation of polyphosphate with the aid of an enzyme isolated from *Azotobacter Vinelandii* 950

V. S. Sukhareva. Comparative studies of the distribution of amino acid tracers introduced into albumin in vivo and in vitro 954

ZOOLOGY

I. A. Neifel' dt. The forest wagtail (*Dendronanthus indicus* Gm.) in the forests of the upper reaches of the Amur river 957

T. S. Petipa. The role of *Noctiluca miliaris* Sur. in the nutrition of *Calanus helgolandicus* Claus. 961

PHYSIOLOGY

V. G. Samsonova, V. A. Il' ianok. Variations in the biological currents of human brain acted upon with by complex rhythmical light stimuli . . . 964

ERRATUM

In the article by **V. D. Glezer**, “Bulbous adaptation as a nervous process,” published in DAN, vol. 126, no. 5, 1959, in Fig. 2 on the abscissa axis, instead of 100 and 200 one should read 10^0 and 20^0 ; in Fig. 3 of the graphs, instead of 0.03; 0.05; 0.10; 0.25; 2.00 one should read 0'03"; 0'05"; 0'10"; 0'25"; 2'00".

In the article by **I. P. Alimarin and D. I. Kuznetsov**, “*o*-Hydroxybenzenesulfonic acid—a new analytical reagent and structural analog of salicylic acid,” printed in DAN, vol. 131, no. 4, 1960, at the end of p. 822, formulas 1, 3, and 4 were included by mistake. There should be only the formula:

Fe^{++} complex of *o*-hydroxybenzenesulfonic acid

In Fig. 3, on the abscissa axis, instead of the printed 12.0, it should be 10.0.

T-05457. Signed for printing 16 V 1960. Print run 5125 copies. Order 384.
 Paper format $70 \times 108^{1/16}$. Paper sheets $7^{1/2}$. Printed sheets 20.55 + 1 insert.
 Publishing sheets 21.0.
 2nd printing house of the Publishing House of the Academy of Sciences of the USSR. Moscow, Shubinskii Lane, 10.
