Correction

In my note (**R. G. Mamedov**, *DAN*, vol. 128, no. 3, 1959), Theorem 2 was unjustifiably applied, as an example, to Fejér's operator. For Fejér's operator the conditions of Theorem 2 are not satisfied. Therefore, as A. V. Efimov kindly informed me, equality (16) is incorrect. If in equality (16) $f''(x)$ is replaced by $\bar{f}_n(x)$, then the well-known result of M. Zamansky on the approximation of functions by Fejér sums is obtained.
