## Abstract

## Full Text

## GENETICS

**D. K. Beliaev, V. A. Ratner.** An analysis of genetic and phenotypic correlations in connection with certain problems of selection and evolution . . . . . 699

**N. P. Dubinin, L. V. Cherejanova.** Antimutagenic and mutagenic effect of streptomycin . . . . . 703

## BIOPHYSICS

**Z. J. Graevskii, M. M. Konstantinova.** The radio-protective effect of aminoethyliso-thiuronium  $\text{Br} \cdot \text{HBr}$  as independent the «oxygen effect» . . . . . 705

**B. N. Tarusov, Iu. P. Kozlov.** Polymer grafts on radiated wheat seeds . . . . . 709

**V. N. Shredel.** The effect of ionizing radiation on the nucleic exchange in sex-cells of males, in connection with the development of either male or female individuals among their progeny . . . . . 713

## BIOCHEMISTRY

**G. P. Serenkov, E. Preüsser.** On caffeine biosynthesis in the leaves of the tea plant . . . . . 716

## ZOOLOGY

**M. I. Sirotina.** Hematological control involved in the development of a microbiological method for exterminating the Colorado beetle . . . . . 720

## PHYSIOLOGY

**M. M. Gromakovskaia.** The role of serotonin in the action of the central nervous system on the working ability of the neuromuscular apparatus . . . . . 724

**S. K. Karapetian, N. G. Mikhaelian.** On the plasticity of conductive paths of the spinal cord in birds as related to the nervous control of the reproductive function . . . . . 728

**Kh. S. Koshtoiantz, N. A. Smirnova.** The effect produced by ribonucleic acid on direct and indirect excitability of a neuro-muscular frog preparation . . . . . 731

## PARASITOLOGY

**L. G. Tatarinova, N. P. Belikova.** Transmission of tick encephalitis virus by *Haemaphysalis neumanni* D. in experiment . . . . . 734

## CORRECTIONS

In my article (V. P. Gromyko, “On a certain criterion for the speciality of  $\pi d$ -groups” ), published in DAN, vol. 138, No. 2, 1961, Theorem 3 should read:

**Theorem 3.** Every  $\pi d$ -group  $G$  of  $\pi$ -type 3, for which  $m \neq p$  ( $p$  is a prime number), is  $\pi$ -solvable.

### V. P. Gromyko

In my article (S. I. Pokhozhaev, “On a boundary-value problem for the equation  $\Delta u = u^2$ ”), published in DAN, vol. 138, No. 2, 1961, p. 305, line 19 in the right-hand side of the inequality for  $\mu$ , instead of

$$\frac{(\sqrt{2c})^{3/s}}{3}$$

there should be

$$\sqrt{2}c.$$

### S. I. Pokhozhaev
