Abstract

Full Text

GENETICS

D. K. Beliaev, V. A. Ratner. An analysis of genetic and phenotypic correlations in connection with certain problems of selection and evolution 699

N. P. Dubinin, L. V. Cherejanova. Antimutagenic and mutagenic effect of streptomycin 703

BIOPHYSICS

Z. J. Graevskii, M. M. Konstantinova. The radio-protective effect of aminoethyliso-thiuronium Br · HBr as independent the “oxygen effect” 705

V. N. Tarusov, Iu. P. Kozlov. Polymer grafts on radiated wheat seeds. 709

V. N. Shredel. The effect of ionizing radiation on the nucleic exchange in sex-cells of males, in connection with the development of either male or female individuals among their progeny 713

BIOCHEMISTRY

G. P. Serenkov, E. Preüsser. On caffeine biosynthesis in the leaves of the tea plant 716

ZOOLOGY

M. I. Sirotna. Hematological control involved in the development of a microbiological method for exterminating the Colorado beetle 720

PHYSIOLOGY

M. M. Gromakovskaia. The role of serotonin in the action of the central nervous system on the working ability of the neuromuscular apparatus 724

S. K. Karapetian, N. G. Mikhaelian. On the plasticity of conductive paths of the spinal cord in birds as related to the nervous control of the reproductive function 728

Kh. S. Koshtoiantz, N. A. Smirnova. The effect produced by ribonucleic acid on direct and indirect excitability of a neuro-muscular frog preparation 731

PARASITOLOGY

L. G. Tatarinova, N. P. Belikova. Transmission of tick encephalitis virus by *Haemaphysalis neumanni* D. in experiment 734

CORRECTIONS

In my article (**V. P. Gromyko**, “On a Certain Criterion for the Speciality of πd -Groups”), published in *Doklady Akademii Nauk*, vol. 138, no. 2, 1961, Theorem 3 should read:

Theorem 3. Every πd -group G of π -type 3 for which $m \neq p$ (p is a prime number) is π -solvable.

V. P. Gromyko

In my article (**S. I. Pokhozhaev**, “On the Boundary-Value Problem for the Equation $\Delta u = u^2$ ”), published in *Doklady Akademii Nauk*, vol. 138, no. 2, 1961, p. 305, line 19, in the right-hand side of the inequality for μ , instead of

$$\frac{(\sqrt{2c})^{3/5}}{3}$$

there should be

$$\sqrt{2}c.$$

S. I. Pokhozhaev
