Abstract

Full Text

S. V. Litvin. Typomorphic garnet varieties in deposits of the Upper Carboniferous of the Dnieper-Donetz depression and Donetz basin margins –903

PALEONTOLOGY

V. V. Lamakin. Some geographic peculiarities in the composition of the plant pollen from pleistocene deposits along the coast of the lake Baikal –906

CYTOLOGY

T. I. Poliakova. A study of physiological regeneration and cellular cycle in the epithelium of *Rana temporaria*, carried out with the aid of H³-thymidine –910

V. B. Svinkin. Thermoresistivity of egg-cells of *Rana temporaria* L. at early stages of cleavage –913

N. A. Chernogriadskaia, M. S. Shudel' . A contribution to the problem of ultraviolet fluorescence of perinuclear bodies of spermatids in certain Acrididae –917

HISTOLOGY

N. S. Kositzyn. Certain peculiar features in the internal organization of the gigantocellular area of the reticular formation of the brain stem –920

GENETICS

P. G. Svetlov, G. F. Korsakova. Wing dimensions in mutants vestigial of *Drosophila melanogaster*, as dependent on temperature conditions of development during larval and proembryonic period of ontogenesis –922

BIOPHYSICS

V. N. Shreder. Biochemical changes taking place in spermatozoa and blood of X-rayed rabbits as connected with numeric predominance of male sex among their progeny –926

BIOCHEMISTRY

B. N. Gladyshev. Hexose-amine containing compounds of the type of dipolysaccharids from leaves of phaseolus and potato (phytolipopolysaccharids) –929

O. L. Polianovskii, A. E. Braunstein. Interaction between certain thiol compounds and highly purified aspartate-glutamate-transaminase –933

M. F. Shemiakin, R. B. Khesin. Formation of complexes of M-RNA with DRA
–937

PLANT PHYSIOLOGY

K. Z. Gamburg. The effect of gibberellin and auxin on the growth of the first
leaf and on the root formation in sections of corn seedlings –941

PHYSIOLOGY

E. A. Liberman, L. M. Tzofina, I. M. Glagoleva. Generation of action potentials
by muscular fibres of Crustacea in solutions containing mixtures of BaCl₂ and
SrCl₂ –945

A. I. Shapovalov. Responses of individual motor and intermediate neurons of
the spinal cord to rhythmical stimulation accompanying polarization –949

G. K. Shlygin, E. N. Vasilieva, R. V. Narodetzkaia. A lipotropic agent of the
intestine –953

CORRECTION

In my article (G. V. Badalyan, “Generalized regularly monotone functions and
a criterion for the absolute convergence of a quasipower series”), published in
DAN, vol. 142, No. 1, 1962, Theorem 5 should read:

Theorem 5. In order that a function

$$\varphi(t) \in AT_{\gamma,x}(0, u], \quad x \geq 0,$$

it is necessary and sufficient that it be representable in the form of the difference
of two such functions of the class $R_{\gamma}(0, u]$, the sum of which belongs to the class
 $AC_{\gamma,x}(0, u]$.
