Abstract

Full Text

ERRATA

In the article by **G. M. Shavlovsky, E. M. Tsarenko, and I. S. Fiktash**, “Features of flavin synthesis by the yeast *Candida tropicalis* var. *rhagii*,” published in DAN, vol. 142, no. 4, 1962.

	Printed	Should read
P. 940, line 20 from bottom	50°	30°
Table 1, 1st column, last two lines	2,12	0,12
Table 1, 1st column, last two lines	2,30	0,30

In the article by **V. N. Svechnikov and A. Ts. Spektor**, “The phase diagram iron–zirconium,” published in DAN, vol. 143, no. 3, 1962, on p. 613, line 2, instead of “in the region 0.16% Zr,” it should read: “in the region 0–16% Zr.”

In my article (**S. N. Gorodensky**, “A new method for calculating magnetic disturbances”), published in DAN, vol. 144, no. 1, 1962, an inaccuracy crept into the printed text.

Under the stated conditions, the approximate version of formula (18) should have the form

$$W_a \approx j \frac{1}{3} \frac{Rd}{z_0^2}.$$

The terms $\left(\frac{d}{R}\right)^2$ under the radicals in formulas (20) disappear, and the factors $e^{-j \arctg R^2/z_0^2}$ in (20) and (21) turn into $(-j)$. The moduli in (21) practically do not change.

S. Gorodensky
