Abstract

Full Text

HISTOLOGY

T. L. Likhacheva. Afferent innervation of ganglia of human rectum 1189

N. V. Nechaeva. Total protein content in the cytoplasm and nuclei of acini-form cells studied in the process of the secretory cycle of the parotid gland . . 1192

MICROBIOLOGY

V. N. Shaposhnikov, N. S. Egorov, V. V. Korshunov. A contribution to the physiology of amino-acid metabolism *Bacillus brevis* var G.-B. 1196

BIOPHYSICS

G. G. Afanasiev, L. P. Lipchina, I. I. Pelevina. Sensibilization of tumoral cells to the effect of ionizing radiation, caused by inhibitors of radical reactions. 1199

N. V. Koviazin. The rate of growth of yeast cells irradiated by ultraviolet rays of different wave length 1202

BIOCHEMISTRY

A. L. Paducheva, Z. I. Volkova, Zh. A. Feofilova. The rate of appearance of sulphur-containing precursors of hair keratine in the skin of sheep, following peroral administration of radioactive sulphate and methioanine 1205

I. I. Sapezhinskii, M. S. Postnikova, N. M. Emanuel' . Interaction between radicals of irradiated protein and alkylphenols 1207

PLANT ANATOMY

Sh. G. Dadasheva. A comparative anatomic analysis of the adaptation of leaves and wood of certain plants growing in Azerbaidjan to drought conditions . . 1211

EVOLUTIONAL MORPHOLOGY

I. M. Medvedeva. Development and reduction of lacrimonasal duct in *Pleurodeles waltlii* 1215

PHYSIOLOGY

N. Y. Alexeenko. The dynamics of variations of sound localization, taking place under the influence of proprioceptive stimuli. 1218

V. I. Voitkevich. The hematopoetic activity of blood serum in humans after the cessation of the effect of chronic hypoxic factor 1221

J. L. Rapoport, I. I. Finkel' . The morphodynamics of internal secretion in the process of immunogenesis 1224

V. V. Frolov, N. S. Verkhatskii. Changes in the sensitivity of effectors to the influence of neural and humoral stimulants in the course of ageing of the organism 1228

CORRECTION

In my article (B. M. Schein, "On subdirectly indecomposable semigroups"), published in DAN, vol. 144, no. 5, 1962, there is an inaccuracy: the corollary to Theorem 7 should be formulated as follows:

Corollary. The set of noninvertible elements of a subdirectly indecomposable finite commutative semigroup is empty or forms a nilpotent subsemigroup. The set of invertible elements is empty or forms a subdirectly indecomposable subgroup isomorphic to a group of the form Z_{p^α} .

B. M. Schein
