## CORRECTIONS

In the article by **N. E. Tovmasyan**, “The Dirichlet problem for an elliptic system of two second-order differential equations,” published in *DAN*, vol. 153, No. 1, 1963, on p. 59, instead of equation (5) there should be

$$\frac{\partial}{\partial z} \left[ \left( \frac{1-z}{4} \frac{\partial \bar{u}}{\partial z} + \frac{\partial u}{\partial \bar{z}} \right) \beta \right] = 0.$$

In my article (**A. Yu. Levin**, “On linear differential equations of the second order” ), published in *DAN*, vol. 153, No. 6, 1963, both signs in inequalities (3) should be replaced by the opposite ones. The inequalities should read:

$$x_1(t) \leq C_1 \exp \left( \int_{t_0}^t \sqrt{q(s)} ds \right), \quad x_2(t) \leq C_2 \exp \left( - \int_{t_0}^t \sqrt{q(s)} ds \right).$$
