Radiotelemetry in the study of the evacuatory function of the stomach . . . 719

CORRECTIONS

In my article (V. E. Voskresenskii, “Functor-spaces of the group of ideals of an algebraic group and cohomology of bundles”), published in *DAN*, vol. 150, no. 3, 1963, the connection between the group G and the splitting field of Theorem 1 and 2 should be understood under the condition that G is rational over k . This condition, apparently, is not necessary. Further, on p. 460, line 6 from the bottom, instead of $i_1 : H'(X, A) \rightarrow H'(X, B)$, one should read $p_1 : H'(X, B) \rightarrow H^1(X, C)$.

V. E. Voskresenskii

In my article (G. Sh. Rubinshtein, Dual Extremal Problems), published in *DAN*, vol. 152, no. 2, 1963, the footnote on p. 289 is inaccurate; for its correction, points that are external with respect to a convex set A should be understood as points not belonging to the $(*)$ -closure of A . A convex set A is called $(*)$ -closed if it contains all points a such that, for some $l \in E$, $t > 0$, the set $\{a + \tau l : 0 < \tau < t\} \subset A$.

G. Sh. Rubinshtein
