EXPERIMENTAL MORPHOLOGY

A. A. Voitkevich, T. K. Chekh. Effect of extirpation of the embryonic anlagen of the neurosecretory-hypophyseal systems in amphibians –1183

PHYSIOLOGY

E. B. Babsky, L. S. Ulyaninsky. A direct proof of the suppression of the automaty of ventricular rhythm conductors by means of a frequent rate of stimuli –1187

N. N. Iushitova, P. De Ley, A. M. Ugolev. An analysis of the localization of invertase in the cells of the small intestine by comparing the concentrations of hydrolysis products in intra- and extracellular liquids –1191

V. G. Kassil' . The drinking stimulus and the rate of water passage from the stomach into the intestine –1194

ENDOCRINOLOGY

A. V. Abuladze, A. I. Sludskaia. Some peculiar traits and the picture of peripheral blood in white mice thymectomised at an early postnatal period –1197

CORRECTION

In my article (I. A. Aleksandrov, “A variational method for solving extremal problems in certain classes of analytic functions”), published in *Doklady Akademii Nauk*, vol. 151, no. 5, 1963, the following correction should be made.

On p. 1002, line 7 from the bottom, it was printed:

$$\text{that } f(w) = \eta w, \quad |\eta| = 1.$$

It should read:

$$\text{that } f(w) = \eta_0 w \frac{Q_n(w)}{w^n \overline{Q_n\left(\frac{1}{\bar{w}}\right)}}, \quad \text{where } Q_n(w) = \sum_{j=1}^{n+1} \mu_j \prod_{\substack{k=1 \\ k \neq j}}^{n+1} (w + \eta_k), \quad |\eta_k| = 1 \quad (k = 0, 1, \dots, n+1),$$

$$\mu_k > 0 \quad (k = 1, 2, \dots, n+1), \quad \sum_{k=1}^{n+1} \mu_k = 1, \quad \text{and for (3) } n \leq m+1.$$

I. A. Aleksandrov
