CORRECTIONS

In my article (V. E. Voskresenskii, "Factor spaces of the idele group of an algebraic group and cohomology of sheaves"), published in *DAN*, vol. 150, no. 3, 1963, the connection between the group G of a deficiency for representability of Type 1 and 2 is as follows: it should be assumed that G is rational over k . This condition apparently is not necessary. Further, on p. 460, line 6 from the bottom, instead of $i_1 : H'(X, A) \rightarrow H'(X, B)$, one should read $p_1 : H'(X, B) \rightarrow H'(X, C)$.

V. E. Voskresenskii

In my article (G. Sh. Rubinshtein, "Dual extremal problems"), published in *DAN*, vol. 152, no. 2, 1963, the externality introduced on p. 289 should be understood, for the correction of which with respect to the convex set A , as points not belonging to the $(*)$ -closure of A . A convex set A is called $(*)$ -closed if it contains all points a such that, for some $l \in E$, $t > 0$, the set $\{a + \tau l : 0 < \tau < t\} \subset A$.

G. Sh. Rubinshtein
