Corrections

In the article by Pavel Todorov, “On the Poles and Radius of Circular Univalence of the Meromorphic Class Φ ,” published in DAN, vol. 163, no. 3, 1965, the following corrections must be made.

On p. 533, in the statement of Theorem 3, where it reads: “...an arbitrary function of class Φ ...,” it should read: “...the derivative of a function of class Φ ...”

On p. 533, in formula (7), where it reads

$$\lg \frac{\pi}{2(m_\sigma + 1)},$$

it should read

$$\operatorname{tg} \frac{\pi}{2(m_\sigma + 1)}.$$

In my article (L. A. Dikarev, “On the Characteristic Temperature of Suspensions”), published in DAN, vol. 163, no. 6, 1965, the following corrections must be made.

On p. 1356, line 11, where it reads

$$\xi = (\rho_1/\rho_2)(v_1 - v_2)^2 - 1,$$

it should read

$$\xi = (\rho_1/\rho_2)(v_1/v_2)^2 - 1.$$

On p. 1357, line 23 from the bottom, where it reads 0.02°C , it should read 0.2°C .

L. A. Dikarev
