Abstract

Full Text

Erratum

In my article (A. I. Smirnov, “Oscillations of an unbounded layered plate in a gas flow”), published in *DAN*, vol. 172, no. 4, 1967, the following corrections must be made.

On p. 803, formulas (3.13) should read

$$\xi = -\frac{2(x+1)\sqrt{(1-M^2x^2)^3}}{2-M^2x^2},$$
$$\eta = \frac{2+M^2x^2(x-1)}{2-M^2x^2}(x+1). \quad (3.13)$$

On p. 804, formula (3.15) should read

$$\Delta = 2 - M^2x^2 > 0. \quad (3.15)$$

A. I. Smirnov

In my article (P. G. Aizengendler, “Application of the Newton diagram to the problem of stability of periodic solutions”), published in *DAN*, vol. 179, no. 5, 1968, the following correction must be made. On p. 1018, line 11 is printed incorrectly; it should read “positive” ; on the same page, line 14 reads $s > 1$, but should be $s > 2$.

P. G. Aizengendler

Note: Figure translations are in progress. See original paper for figures.
