Abstract

Full Text

Letter to the Editor

After my article “On the representation of solvable groups by matrices over a field of characteristic zero,” published in *Doklady Akademii Nauk*, vol. 188, no. 3, 1969, had been submitted to the editorial office, there appeared the article by Yu. I. Merzlyakov, “On the matrix representation of automorphisms, extensions, and solvable groups” (*Algebra and Logic, Seminar*, 7, no. 3, 63 (1968)), which essentially contains Theorem 1; the article by V. M. Kopylov, “On matrix groups” (*Algebra and Logic, Seminar*, 7, no. 3, 51 (1968)), which contains a consequence of Theorem 1 of my work; and the article by V. N. Remeslennikov, “Representation of finitely generated metabelian groups by matrices” (*Algebra and Logic, Seminar*, 8, no. 1, 72 (1969)), which gives a generalization of Theorem 3 from my work.

I offer the above-mentioned authors my apologies for the references not made in due time.

E. M. Levich
