Ext. Lunar Surface.

As the rumbling of
the Gravitron rises
in volume the CYBERMEN
stop in their tracks.

CUT

The lowered probe
blasting out the
power. The
movements of the
CYBERMEN start
to become jerky, their
feet leave the ground.
Then, one by one,
they rise into the
air frantically
gesticulating,
weapons and other
items of their
equipment swirling
around them.
They accelerate
rapidly into the black
of space and dwindle as
gleaming spots of
light, diminishing
into the stars.

CUT

The lowered probe
and the massive
rumble of the
machine.

Finally CUT to three
models of CYBERMAN
space ships, shifting
slightly on the
crater floor, then
rising slowly and
massively into
the air and then
accelerating more
and more rapidly
again up into space
as their gravity is
neutralised. It
too finally vanishes
as a speck in the
space backdrop one
after the other, like
giant catherine wheels.
